DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

2. Claim 11 is objected to because of the following informalities: In line 5 of claim 11 replace "adjusting" with --to adjust--.

In line 7 of claim 11 after the term "first protection signal" insert --,--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because the claim is misdescriptive. Claim 1 discloses driving or not driving the target clock signal based on a first or second logic level of the input signal. From the examiner's review of the disclosure, this is not accurate. In the specification, applicant discloses that the decision to drive or not to drive the target clock signal to be synchronous with the input signal is based on the first protection

signal (S9) and not the logic level of the input signal (S4/S5). Correction or clarification is required.

Claims 2-10 are also rejected due to the limitations of the base claim and any intervening claims.

Allowable Subject Matter

5. Claims 11-18 are allowed.

6. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. Claims 2-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-10 would be allowable if amended to overcome the 112 rejections because the closest prior art of record fails to disclose a circuit as shown in Figure 4 wherein the circuit includes a comparing circuit (89) in combination with the rest of the limitations of the base claims and any intervening claims.

9. The following is an examiner's statement of reasons for allowance: Claims 1-18 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 4 wherein the method of operating the circuit comprises generating a first protection signal (S9) according to voltage differences between a combining signal (output of mixer 92) generated from peak values of the input signal (S4) and a reference

voltage (V_{ref}) in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
